

# Contents

<b>1</b>	<b>Introduction</b>	<b>8</b>
1.1	Empirical Industrial Organization	8
1.2	Data in Empirical IO	10
1.3	Structural models in Empirical IO	12
1.3.1	Empirical question .....	12
1.3.2	Model .....	12
1.3.3	Data .....	13
1.3.4	Components of the model .....	13
1.3.5	Endogeneity and identification .....	14
1.3.6	Demand equation .....	14
1.3.7	Cost function .....	15
1.3.8	Revealed Preference .....	16
1.3.9	Cournot competition .....	16
1.3.10	Market entry .....	17
1.3.11	Structural equations .....	19
<b>1.4</b>	<b>Identification and estimation</b>	<b>20</b>
1.4.1	Reduced form equations .....	21
1.4.2	Estimation of structural model .....	24
1.4.3	Extensions .....	31
<b>1.5</b>	<b>Summary</b>	<b>31</b>
<b>1.6</b>	<b>Exercises</b>	<b>32</b>
1.6.1	Exercise 1 .....	32
1.6.2	Exercise 2 .....	32
1.6.3	Exercise 3 .....	32

---

<b>2</b>	<b>Consumer Demand</b>	<b>33</b>
2.1	Introduction	33
2.2	Demand systems in product space	34
2.2.1	Model	34
2.2.2	Multi-stage budgeting	39
2.2.3	Estimation	40
2.2.4	Some limitations	40
2.2.5	Dealing with limitations	42
2.3	Demand in characteristics space	45
2.3.1	Model	45
2.3.2	Logit model	46
2.3.3	Nested Logit model	47
2.3.4	Random Coefficients Logit	47
2.3.5	Berry's Inversion Property	49
2.3.6	Dealing with limitations	50
2.3.7	Estimation	51
2.3.8	Nonparametric identification	57
2.4	Valuation of product innovations	58
2.4.1	Hausman on cereals	59
2.4.2	Trajtenberg (1989)	60
2.4.3	Petrin (2002) on minivans	60
2.4.4	Logit and new products	62
2.4.5	Product complementarity	63
2.5	Appendix	69
2.5.1	Derivation of demand systems	69
2.6	Exercises	72
2.6.1	Exercise 1	72
2.6.2	Exercise 2	72
<b>3</b>	<b>Production Functions</b>	<b>75</b>
3.1	Introduction	75
3.2	Model and data	76
3.2.1	Model	76
3.2.2	Data	78
3.3	Econometric issues	78
3.3.1	Simultaneity problem	79
3.3.2	Endogenous exit	81
3.4	Estimation methods	83
3.4.1	Input prices as instruments	83
3.4.2	Panel data: Fixed-effects	84
3.4.3	Dynamic panel data: GMM	85

3.4.4	Control function methods .....	89
3.4.5	Endogenous exit .....	101
<b>3.5</b>	<b>Determinants of productivity</b>	<b>103</b>
3.5.1	What determines productivity? .....	103
3.5.2	TFP dispersion in equilibrium .....	104
3.5.3	How can firms improve their TFP? .....	104
<b>3.6</b>	<b>R&amp;D and productivity</b>	<b>105</b>
3.6.1	Knowledge capital model .....	105
3.6.2	An application .....	106
<b>3.7</b>	<b>Exercises</b>	<b>109</b>
3.7.1	Exercise 1 .....	109
3.7.2	Exercise 2 .....	112
3.7.3	Exercise 3 .....	113
<b>4</b>	<b>Competition in prices/quantities</b>	<b>117</b>
<b>4.1</b>	<b>Introduction</b>	<b>117</b>
<b>4.2</b>	<b>Homogenous product industry</b>	<b>119</b>
4.2.1	Estimating marginal costs .....	119
4.2.2	The nature of competition .....	121
<b>4.3</b>	<b>Differentiated product industry</b>	<b>134</b>
4.3.1	Model .....	134
4.3.2	Estimating marginal costs .....	137
4.3.3	Testing hypotheses on nature of competition .....	138
4.3.4	Estimating the nature of competition .....	139
4.3.5	Conjectural variations with differentiated product .....	141
<b>4.4</b>	<b>Incomplete information</b>	<b>143</b>
4.4.1	Cournot competition with private information .....	143
<b>4.5</b>	<b>Exercises</b>	<b>147</b>
4.5.1	Exercise 1 .....	147
4.5.2	Exercise 2 .....	148
<b>5</b>	<b>Market Entry</b>	<b>150</b>
<b>5.1</b>	<b>Introduction</b>	<b>150</b>
<b>5.2</b>	<b>General ideas</b>	<b>151</b>
5.2.1	What is a model of market entry? .....	151
5.2.2	Why estimating entry models? .....	152
<b>5.3</b>	<b>Data</b>	<b>153</b>
5.3.1	Geographic markets .....	154
5.3.2	Spatial competition .....	154
5.3.3	Store level data .....	156
5.3.4	Potential entrants .....	156

<b>5.4 Models</b>	<b>157</b>
5.4.1 Single- and Multi-store firms .....	159
5.4.2 Homogeneous firms .....	162
5.4.3 Endogenous product choice .....	168
5.4.4 Firm heterogeneity .....	169
5.4.5 Incomplete information .....	174
5.4.6 Entry and spatial competition .....	178
5.4.7 Multi-store firms .....	184
<b>5.5 Estimation</b>	<b>187</b>
5.5.1 Multiple Equilibria .....	187
5.5.2 Unobserved market heterogeneity .....	190
5.5.3 Computation .....	191
<b>5.6 Further topics</b>	<b>192</b>
<b>6 Introduction to Dynamics .....</b>	<b>194</b>
<b>6.1 Introduction</b>	<b>194</b>
<b>6.2 Firms' investment decisions</b>	<b>199</b>
6.2.1 Model .....	201
6.2.2 Solving the dynamic programming problem .....	203
6.2.3 Estimation .....	207
<b>6.3 Patent Renewal Models</b>	<b>209</b>
6.3.1 Pakes (1986) .....	209
6.3.2 <i>Ianjow_1999 (ianjow_1999)</i> .....	215
6.3.3 Trade of patents: Serrano (2018) .....	215
<b>6.4 Dynamic pricing</b>	<b>219</b>
6.4.1 Aguirregabiria (1999) .....	221
<b>7 Dynamic Consumer Demand .....</b>	<b>227</b>
<b>7.1 Introduction</b>	<b>227</b>
<b>7.2 Data and descriptive evidence</b>	<b>228</b>
<b>7.3 Model</b>	<b>229</b>
7.3.1 Basic Assumptions .....	229
7.3.2 Reducing the dimension of the state space .....	232
<b>7.4 Estimation</b>	<b>234</b>
7.4.1 Estimation of brand choice .....	234
7.4.2 Estimation of quantity choice .....	238
<b>7.5 Empirical Results</b>	<b>239</b>
<b>7.6 Dynamic Demand of Differentiated Durable Products</b>	<b>239</b>

<b>8</b>	<b>Dynamic Games: Model and Methods</b>	240
8.1	Introduction	240
8.2	Dynamic version of Bresnahan-Reiss model	241
8.2.1	Motivation	241
8.2.2	Model	241
8.2.3	Identification	244
8.2.4	Estimation of the model	246
8.2.5	Structural model and counterfactual experiments	247
8.3	The structure of dynamic games of oligopoly competition	249
8.3.1	Basic Framework and Assumptions	249
8.3.2	Markov Perfect Equilibrium	252
8.3.3	Conditional Choice Probabilities	253
8.3.4	Computing $v_i^P$ for arbitrary $P$	254
8.4	Reducing the State Space	272
8.5	Counterfactual experiments with multiple equilibria	274
<b>9</b>	<b>Dynamic Games: Applications</b>	276
9.1	Environmental Regulation in the Cement Industry	277
9.1.1	Motivation and Empirical Questions	277
9.1.2	The US Cement Industry	277
9.1.3	The Regulation (Policy Change)	277
9.1.4	Empirical Strategy	278
9.1.5	Data	278
9.1.6	Model	278
9.1.7	Estimation and Results	279
9.2	Dynamic game of store location	279
9.2.1	Single-store firms	280
9.2.2	Multi-store firms	281
9.3	Product repositioning in differentiated product markets	282
9.4	Dynamic Game of Airlines Network Competition	282
9.4.1	Motivation and Empirical Questions	282
9.4.2	Model: Dynamic Game of Network Competition	283
9.4.3	Data	284
9.4.4	Specification and Estimation of Demand	287
9.4.5	Specification and Estimation of Marginal Cost	289
9.4.6	Simplifying assumptions for solution and estimation of dynamic game of network competition	290
9.4.7	Estimation of dynamic game of network competition	291
9.4.8	Counterfactual Experiments	293

<b>9.5</b>	<b>Dynamic strategic behavior in firms' innovation</b>	<b>295</b>
9.5.1	Competition and Innovation: static analysis .....	295
9.5.2	Creative destruction: incentives to innovate of incumbents and new entrants	296
9.5.3	Competition and innovation in the CPU industry: Intel and AMD .....	300
<b>10</b>	<b>Auctions .....</b>	<b>323</b>
10.1	<b>Introduction</b>	<b>323</b>
<b>11</b>	<b>Appendix 1: Random Utility Models .....</b>	<b>328</b>
11.1	<b>Introduction</b>	<b>328</b>
11.2	<b>Multinomial logit (MNL)</b>	<b>329</b>
11.3	<b>Nested logit (NL)</b>	<b>331</b>
11.4	<b>Ordered GEV (OGEV)</b>	<b>333</b>
<b>12</b>	<b>Appendix 2 .....</b>	<b>335</b>
12.1	<b>Problem set #1</b>	<b>335</b>
12.2	<b>Problem set #2</b>	<b>337</b>
12.3	<b>Problem set #3</b>	<b>340</b>
12.4	<b>Problem set #4</b>	<b>345</b>
12.5	<b>Problem set #5</b>	<b>346</b>
12.6	<b>Problem set #6</b>	<b>351</b>
12.7	<b>Problem set #7</b>	<b>352</b>
12.8	<b>Problem set #8</b>	<b>352</b>
12.9	<b>Problem set #9</b>	<b>353</b>
12.10	<b>Problem set #10</b>	<b>353</b>
12.11	<b>Problem set #11</b>	<b>354</b>
12.12	<b>Problem set #12</b>	<b>355</b>
